

LIFE IN BALANCE: PODIATRY-FOCUSED FALL PREVENTION

LIFE IN BALANCE
POWERED BY SAFE BALANCE

LIFE IN BALANCE IS AN EVOLUTIONARY ENHANCEMENT TO THE SAFE BALANCE SOLUTION DESIGNED FOR AND IN PART BY PODIATRISTS TO SERVE THE UNIQUE NEEDS TO THEIR PATIENT POPULATION.

Focusing on Podiatric conditions and interventions, Life in Balance maintains the existing operation and process found in Safe Balance, and expands the testing features to assess/treat conditions of the foot and ankle.

Using a proprietary algorithm calculating individual and combinations of risk factors, muscle grades, balance tests and more, the Life in Balance software provides unique reporting complete with documentation required for the dispensing of custom bracing/orthotic solutions.
